SUMMARY

Mobile developer with 4 years of experience in Flutter and Dart, Clean Architecture and BLoC, with native integrations in Kotlin and Swift. Published 23 apps on the App Store and Google Play with over 5,500 downloads, and currently building a public-sector financial app focused on security (Play Integrity, App Attest and facial biometrics), automated testing and CI/CD, at 98% crash-free sessions in user acceptance testing. Use AI in my daily development workflow (Claude Code). M.Sc. in Computer Science from UFMA.

EXPERIENCE

Citiesoft | São Luís, Brazil Jan 2026 – Present
Mid-level Mobile Developer

- Built a public-sector financial app in Flutter with banking-grade security requirements, now in user acceptance testing with 98% crash-free sessions and expected to serve around 20,000 beneficiaries at launch.
- Created the identity verification flow combining document data extraction with AWS Rekognition face liveness, integrated through platform channels in Kotlin and Swift.
- Implemented OAuth authentication with Keycloak and device security with App Attest (iOS) and Play Integrity (Android), and unblocked iOS NFC reading with a native platform channel when the Flutter package fell short.
- Set up the CI pipeline that validates each pull request in about 10 minutes on Jenkins (formatting, static analysis, automated tests and a coverage gate), wrote integration tests with integration_test and automated store releases with Fastlane.
- Serve as the team technical reference: defined the architecture standards (Clean Architecture, BLoC/Cubit, get_it, go_router), review pull requests and support technical decisions with the Tech Lead.

UNA-SUS/UFMA | São Luís, Brazil Jan 2022 – Present
Mobile Developer

- Published 23 apps for the university and the Brazilian Federal Government (Ministry of Health and Ministry of Tourism), mostly white-label digital libraries in Flutter, totaling over 5,500 downloads on the App Store and Google Play.
- Took over MTUR Games from a troubled legacy codebase and shipped to both stores 10 educational games in React Native and TypeScript that train tourism professionals to assist people with disabilities.
- Owned the full app lifecycle, from requirements and MVVM architecture with Provider to unit and widget testing, release and production maintenance.
- Integrated Firebase (Auth, Firestore, Crashlytics, Analytics, Cloud Messaging) to monitor production crashes, track usage and send push notifications.

NCA/UFMA | São Luís, Brazil Oct 2024 – Jan 2025
Full Stack Developer

- Developed for an infrastructure-sector client a platform that detects field irregularities from geolocation and satellite imagery, with a Next.js front end and a Python back end.
- Optimized queries on high-volume databases and modeled the data structures behind the platform geospatial visualizations.

EDUCATION

M.Sc. in Computer Science, Federal University of Maranhão (UFMA), research in HCI and UX 2023 – 2025
B.Sc. in Computer Science, Federal University of Maranhão (UFMA) 2019 – 2023

SKILLS

Mobile: Flutter, Dart, Kotlin, Swift, Platform Channels
Architecture: Clean Architecture, BLoC/Cubit, MVVM
Quality: Unit, widget and integration testing, code review
Security: Play Integrity, App Attest, OAuth/Keycloak
CI/CD & Cloud: Jenkins, Azure DevOps, Fastlane, Firebase, AWS
AI: Claude Code (AI-assisted development)
Languages: Portuguese (native), English (advanced, C1 EF SET)
